PART - A READING

(40 MARKS)
(20 marks)

I. Read the passage given below and answer the questions that follow.

1. People have long circulated news via word-of-mouth, and as the language evolved into writing and literacy, and governments played larger roles in people's lives, sharing information became a necessity. However, disseminating news and information on a paper presented significant challenges. When each copy had to be handwritten, mass distribution was impossible. They were first chiseled in stone or metal; later, they were handwritten and distributed in public forums or read from scrolls by town criers. Though both ancient Romans and Chinese, as well as other ancient civilizations had early forms of news media, they did not qualify as newspapers because they could not be mass-distributed.
2. The first true newspapers arrived after Johannes Gutenberg introduced his movable type printing press to the European world around 1440. Though printing presses with movable type had existed in Eastern Asia for around two centuries, they never made it to Europe; furthermore, Gutenberg's version made it significantly faster to mass produce documents. By 1500, the printing press had made its way throughout Europe, and news sheets(or news books) were mass-distributed.
3. The first weekly newspaper was published in Germany by Johann Carolus in 1604. Called 'The Relation AllerFürnemmen und gedenckwürdigenHistorien', the publication satisfied the four tenets of a "true" newspaper: Accessibility by the public, published at a regular interval (daily, weekly, monthly, etc), information is current, covers a variety of topics (politics, events, entertainment, sports etc.) Despite meeting the requirements for a newspaper, there is some debate as to whether 'The Relation' qualifies as the world's first newspaper since it was printed in quarto, not folio, size. It's worth noting the World Association of newspapers considers 'The Relation' the first true newspaper.

4. Other German newspapers followed and in 1618 the world's first broadsheet newspaper printed in folio size was published in Amsterdam, called Courante uyt Italien, Duytslandt, & co. The newspaper format soon spread throughout Europe, with newspapers published in Spain, France and Sweden. The first English newspaper was published in 1665 in Oxford, England. Known as the Oxford Gazette, the newspaper moved to London in 1666 and was renamed the London Gazette. It's still being published today. Soon after, the newspaper became a staple in all major European countries. It then made its way to the New World.

On the basis of your understanding of the passage, answer ANY TEN questions from the twelve that follow: (10×1=10)

- (i) Which of the following options is satisfying the condition for being a "true newspaper"?
- (a) Newspaper which is accessible only to Asian readers.
 - (b) A newspaper which was published only once in a month.

 - (d) A newspaper which provides current information and covers a variety of topics.
- (ii) What paved the way for the "true newspapers"?
- (a) The world's first broadsheet newspaper printed in folio size.
 - (b) The invention of the printing press paved the way for "true" newspapers.
 - (c) As the Government started playing a larger role in people's lives.
 - (d) None of these
- (iii) Which of the following is true regarding newspapers?
- (a) The first weekly newspaper was published in Germany by Johannes Carolus in 1609.
 - (b) The Relation qualifies as the world's first newspaper since it was printed in folio, not quarto.
 - (c) The first English newspaper was published in 1665 in Oxford, England known as the Oxford Gazette.
 - (d) The first English newspaper known as the Oxford Gazette was renamed the London Gazette later.

II. Read the passage given below and answer the questions that follow.

1. Nature depletion to most of us has been reduced to threats of global warming. With the forest cover depleted to a minimum, animals poached to extinction and holidays in wildlife sanctuaries, the interest of a few - to link with nature seems like a distant possibility. Zoos and zoological parks remain the only places for the multitudes to connect with wildlife.

2. Traditionally, zoos have provided an economic form of recreation for people from various strata of society, income and educational levels, ages and socio-economic backgrounds. They offer a large vista of possibilities to educate and sensitise people. According to CEE India, "In India there are more than 150 zoos, and they attracts as many as 50 million visitors annually."

3. Today, children have a wide disconnect with Nature. An attractive place is required for nature education that will provide a competition to internet, television and play stations. Zoos are a place where children get to see the animals. It gives form to their imagination and opens a new world of curiosity. Many grow up to become crusaders of wildlife protection.

4. In India, Reuben David, a champion of wildlife, created the Ahmedabad zoo. During his time, the zoo became one of the most remarkable zoos of India and contributed substantially to conservation and research.

5. Man-animal conflict continues to intensify. The Wildlife Protection Society of India estimated that at least 3,189 leopards were killed since 1994 to 2010. Leopards are targeted as they attack livestock and enter human habitation. The wild animals need protection.

6. Some animal activists talk about banning the zoos. What is the alternate plan to save various critically endangered species? Banning zoos might just accelerate their extinction. Zoos provide breeding places for the species that face a threat of extinction in the jungles. When a species is confined to one place, it faces a threat of being wiped away by a disease, famine or epidemic. Many species are bred in zoos and reintroduced in their natural habitats.

7. The issue should not be to ban the ill-maintained zoos but to put more investment into creating naturalised environment, keep animals healthy and well-fed, facilitate captive breeding programmes, carry out researches, restore endangered species, understand animal behaviour, improve animal husbandry, develop conservation initiatives and educate the visitors. Zoos, a sustainable way of conservation, provide life-system education and have immense educational and research value.

 - (d) $1200x^2 + 80x - 40$
- (ii) Write the expression of the total quantity of fruits purchased.
- (a) $x^2 + x - 10$
 - (b) $x^2 + x + 10$
 - (c) $x^2 - x - 10$
 - (d) $10x^2 + x + 1$
- (iii) Find the degree of the equation of the total cost of quantity of fruits purchased
- (a) 1
 - (b) 2
 - (c) 3
 - (d) 4
- (iv) Find the coefficient of x^2 in equation of the total quantity of fruits purchased
- (a) 1
 - (b) 2
 - (c) 3
 - (d) 4

(v) Find the total cost, when $x=5$

(a) Rs 1600

(b) Rs 2100

(c) Rs 2600

(d) Rs 3100

20. Mathematics teacher of a DAV school took her IXth standard students to show Buland Darwaja. It was a part of their Educational trip. She narrated the facts of Buland Darwaja to students. There are 2 pillars which are cylindrical in shape. Also 2 tombs at the corners which are conical.

(i) Write the formula to find the total surface area of a cylindrical structure.

(a) $\pi r^2 h$

(b) $2\pi r(r + h)$

(c) $\pi r(r + h)$

(d) $2\pi r$

(ii) Find the CSA of each conical tomb if slant height and base diameter are 25 m and 14 m respectively.

(a) 450 sq m

(b) 550 sq m

(c) 650 sq m

(d) 750 sq m

(iii) Find the cost of white washing of CSA of each tomb at the rate of Rs 210 per 100 sq m.

(a) Rs 1255

(b) Rs 1155

(c) Rs 2310

(d) Rs 1355

(iv) Find the LSA of two pillars if height of the pillar is 21 m and radius of the base is 2.1 m.

(a) 454.4 sq m

(b) 554.4 sq m

(c) 1054.4 sq m

(d) 954.4 sq m

(v) Write the formula to find the volume of conical tomb.

(a) $\pi r h$

(b) $\pi r^2 h$

(c) $\frac{1}{3} \pi r^2 h$

(d) $2\pi r h$

PART - B

DIRECTIONS: (Q.Nos. 21-26): These are very short answer type questions of 2 marks each.

[6x2=12]

21. If $2^3(5^0 + 3^{2x}) = 8 \frac{8}{27}$, find x .

OR

Represent $\sqrt{2}$ on the real number line.

22. In the figure given below $AB \parallel DE$, $AE \parallel DC$, $\angle EDC = 65^\circ$, $\angle BCD = 70^\circ$. Find $\angle ABC$.

23. If the altitude from one vertex of a triangle bisects the opposite side, prove that the triangle is isosceles.

24. P is a point equidistant from two lines l and m intersecting at point A. Show that the line AP bisects the angle between them.

OR

Prove that in a kite the angles between both pairs of adjacent non equal sides are equal.

25. The difference of semi-perimeter and sides of a triangle are 150 cm, 100 cm and 20 cm. Find the area of the triangle.

26. If the radius of a sphere is increased by 10%, then find the % increase in its surface area.

DIRECTIONS: (Q. Nos. 27-33): These are short answer type questions of 3 marks each. [7x3=21]

27. Simplify the following :

$$\frac{-3}{\sqrt{3} + \sqrt{2}} - \frac{3\sqrt{2}}{\sqrt{6} + \sqrt{3}} + \frac{4\sqrt{3}}{\sqrt{6} + \sqrt{2}}$$

28. If $x^4 + \frac{1}{x^4} = 47$, find the value of $x^3 + \frac{1}{x^3}$.

OR

Factorize : $x^3 - 3x^2 + 3x + 7$.

29. Water is flowing into a water tank at the rate of $20 \text{ cm}^3/\text{s}$. If the volume of water collected in x seconds is $y \text{ cm}^3$, then write a linear equation for the situation and draw its graph.

From the graph find the volume after 5 seconds.

30. The side QR of triangle PQR is produced such that S is on ray QR. The bisector of $\angle QPR$ meets QR in L. Prove that $\angle PQR + \angle PRS = 2\angle PLR$.

31. A is a point in the interior of square PQRS such that APQ is an equilateral triangle. Show that ARS is an isosceles triangle.

32. A triangular plot ABC has sides 26 m, 28 m and 30 m. Roshan has to put a fence all around it leaving a space 3 m wide for a gate on one side and also plant grass inside it. Find the total cost of fencing with barbed wire at Rs 25 per m and growing grass at Rs 40 per sq m.

33. Water flows through a cylindrical pipe of inner diameter 14 mm at the speed of 10m/s into a cylindrical tank of inner diameter 1000 cm. Find the rise in level of water in the tank in half an hour.

OR

A conical tent of tarpaulin of height 4.8 m and base diameter 2.8 m is to be erected. Assume that 20% area of tarpaulin is used in overlapping, wastage and stitching margins. Find the length of tarpaulin required if the width is 1.1 m.

DIRECTIONS (Q.Nos. 34-36): These are long answer type questions of 5 marks

each.

[5x3=15]

34. Shanti Sweets Stall is placing an order for making cardboard boxes for packaging their sweets. They need boxes to pack spherical laddoos of diameter 5 cm. Two sizes of boxes are required. The bigger of dimensions $25\text{cm} \times 20\text{cm} \times 5\text{cm}$ and the smaller of dimension $15\text{cm} \times 10\text{cm} \times 5\text{cm}$. 4000 laddoos are to be packed in bigger boxes and 1200 laddoos are to be packed in smaller boxes. For all the overlaps 5% of the TSA is required extra. If the cost of cardboard is Rs 4 per 1000 sq cm, then find the cost of cardboard required for making requisite number of boxes for packing the given number of laddoos.

35. In the given figure, ABCD is a square. M is the midpoint of AB and $PQ \perp CM$ meets AD at P and CB produced at Q. Prove that:

- (i) $\Delta PAM \cong \Delta QBM$
- (ii) $\Delta PCM \cong \Delta QCM$
- (iii) $CP = AB + PA$

36. If both $x - 2$ and $x - \frac{1}{2}$ are factors of $px^2 + 5x + r$, show that $p = r$.

OR

If both $x + 1$ and $x - 1$ are factors of $ax^3 + x^2 - 2x + b$, find the values of a and b .

SAIL TOWNSHIP, RANCHI
HALF YEARLY EXAMINATION (2021-2022)

Class:- IX
Time- 3 Hrs.

Subject:- Science
M.M- 80

General Instructions:-

- All Questions are compulsory.
- Marks are indicated against each question.

PHYSICS

Section - A

- A body travels along a circular path of radius 70 m. It travels half a revolution in 20 s. Find the average velocity of the body in this time interval. [1]
- Draw velocity versus time graph of a stone thrown vertically upwards from ground till it returns to ground. [1]
- A body starts to slide over a horizontal surface with an initial velocity of 0.5m/s. Due to friction its velocity decreases at the rate 0.05m/s². How much time will it take for the body to stop? [1]

OR

A racing car starting from rest has a uniform acceleration of 4 m/s². What distance will it cover in 10 s after start?

- Suppose a ball of mass m is thrown vertically upward with an initial speed v . Its speed decreases continuously till it become zero. Thereafter, the ball begins to fall down and attains the speed v again before striking the ground. It implies that the magnitudes of initial and final momentums of the ball are same. Yet, it is not an example of conservation of momentum. Explain why. [1]
- A truck of mass M is moved under a force F . If the truck is then loaded with an object equal to the mass of the truck and the driving force is halved, then how does the acceleration change? [1]
- Explain why some of the leaves **get** detached from a tree if we vigorously shake its branches? [1]

OR

Two identical bullets are fired one by a light rifle and the other by a heavy rifle with the same force. Which rifle will hurt the shoulder more and why?

Section - B

- An object is dropped from rest at a height of 150 m and simultaneously another object is dropped from rest at a height of 100 m. What is the difference in their heights after 2 s if both the objects drop with same acceleration? How does the difference in heights vary with time? [2]

OR

Using following the data to draw displacement- time graph for a moving object:-

Time s	0	2	4	6	8	10	12	14	16
Displacement m	0	2	4	4	4	6	4	2	0

Use this graph to find average velocity for first 4 s and for next 4 s.

8. A bullet of mass 10g travelling horizontally with a velocity of 150 m/s strikes a stationary wooden block and comes to the rest in 0.03 s. calculate the distance of penetration of the bullet into the block. Also calculate the magnitude of the force exerted by the wooden block on the bullet. [2]

Section - C

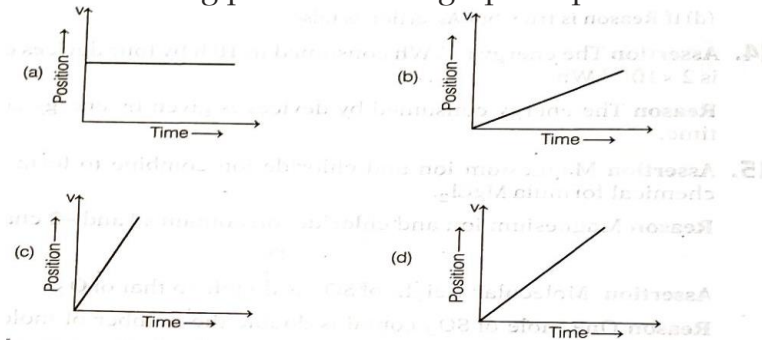

9. (a) Deduce the following equations of motion by graphical method- [3]
(i) $v = u + at$ (ii) $s = ut + \frac{1}{2} at^2$ (iii) $v^2 = u^2 + 2as$.
10. Read the following and answer **any four** questions from 10 (i) to 10 (v) [1x4=4]
When a body moves with constant velocity i.e. its motion is uniform, then its velocity is not changing with time. In uniformly accelerated motion, the velocity changes by equal amount in equal intervals of time while in non- uniformly accelerated motion, the velocity of a body varies non-uniformly with time.
10. (i). The area under velocity- time graph gives -
(a) distance (b) displacement (c) acceleration (d) retardation
- (ii) The velocity -time graph of a body is shown below. The displacement of body in 10 s is-

- (a) 40 m (b) 60 m (c) 75 m (d) 150 m

- (iii). A particle is travelling with a constant speed. This means -
(a) its position remains constant as time passes
(b) it covers equal distances in equal times intervals
(c) its acceleration is zero
(d) it does not change its direction of motion.
- (iv). A moving train is brought to rest within 20 sec by applying brakes. If the retardation due to brakes is 2 m/s^2 , then the initial velocity was-
(a) 10 m/s (b) 20 m/s (c) 30m/s (d) 40 m/s.

(v) Which of the following position -time graphs represents that the object is at rest -

11. Read the following and answer any four question from 11 (I) to 11(v) :-

[1 x4=4]

Newton studied the ideas of Galileo regarding the motion of an object. He formulated three fundamental laws that govern the motion of objects. These three laws are known as Newton's laws of motion.

11 (i) A goalkeeper in the game of football pulls his hands backwards after holding the ball shot at the goal. This enables the goalkeeper to :

- (a) exert larger force on the ball
- (b) reduce the force exerted by the balls on hand
- (c) increase the rate of change of momentum
- (d) decrease the rate of change of momentum.

(ii) According to the third law of motion, action and reaction -

- (a) always act on the same body
- (b) always act on different bodies in opposite directions
- (c) have same magnitude and direction
- (d) act on either body at normal to each other.

(iii) An object of mass 100 kg is accelerated uniformly under the action of a force from a velocity of 5 m/s to 8 m/s in 6 sec . Then magnitude of force acting on object is-

- (a) 40 N
- (b) 60 N
- (c) 75 N
- (d) 50 N

(iv) Velocity- time graph of a moving particle of mass 1 kg is shown below. The force acting on the particle is:-

- (a) zero
- (b) 4 N
- (c) 8 N
- (d) 10 N

(v) The momentum which a dumb bell of mass 10 kg transfer to the floor, if it falls from a height of 80 cm is -

- (a) 10 kg m/s
- (b) 20 kg m/s
- (c) 30 kg m /s
- (d) 40 kg m/s.

Section-D

11. (A) Give the statement of Newton's second laws of motion.

Using second law of motion, derive the relation between force and acceleration.

(B) What is momentum? Write its SI unit. Interpret force in terms of momentum.

Represent the following graphically

(a) Momentum versus velocity when mass is fixed.

(b) Momentum versus mass when velocity is constant.

[5]

OR

(A) What is Law of conservation of linear momentum? Prove it by using Newton's third laws of motion.

(B) Two bodies A and B of mass m_1 and m_2 are moving with velocity V_1 and V_2 in same straight line but in opposite directions, collide with each other. After collision they move together as combined body. Find the common velocity of the combined body.

Given $m_1 = 65 \text{ kg}$, $m_2 = 40 \text{ kg}$ and $V_1 = 6 \text{ m/s}$ and $V_2 = 3 \text{ m/s}$.

CHEMISTRY

Section : A

1. Which one of the following is solid foam?

A) Butter.

B) Bread.

C) Shaving cream.

D) Ruby Stone.

[1]

2. What is suspension? Give one example of it.

[1]

3. The following questions consist of assertion and reason. Use the following key to select the correct answer.

A) Both assertion and reason is correct and reason is correct explanation of assertion.

B) Both assertion and reason are correct but reason is not the correct explanation of assertion.

C) Assertion is true but reason is false.

D) Assertion is false but reason is correct.

Assertion; Oxygen is an element.

Reason: It cannot be decomposed by a physical or a chemical process.

[1]

4. Differentiate between saturated and unsaturated solution.

[1]

5. Read the following passage given below and answer the following questions:

(Any four)

[1 × 4 = 4]

The mole is the unit of amount, in Chemistry. The mole concept is a simple relationship that enables us to count the number of atoms or molecules, just by weighing or measuring volume, without the requirement of any sophisticated costly machine. Hence it is very much possible to count the number of water molecules in a mineral water bottle of one liter, without even actually visualizing the molecules or atoms.

- i) How many moles are there in 3.6 gram of water?
- ii) If one mole of carbon atoms weighs 12 gram, what is the mass of 1 atom of carbon?
- iii) Why the number of atoms of one mole of hydrogen gas, is double the number of atoms in one mole of Helium gas?
- iv) The ratio of moles of atoms in 12 gram of magnesium and 16 gram of sulphur, are:
 A) 3:4
 B) 4:3
 C) 1:1
 D) 1:2
- v) Which of the following has the maximum number of atoms?
 A) 18 gm of H₂O.
 B) 18 gm of O₂.
 C) 18 gm. of CO₂
 D) 18 gm. of CH₄

Section - B

6. State the law of constant proportion with example. [2]
 OR
 Write the limitations of Dalton's atomic theory.
7. Calculate the mass of sodium sulphate required to prepare its 20% (mass percent) solution in 100 gram of water. [2]

Section - C

8. What is Tyndall effect? Give two examples of Tyndall effect observed in your surroundings. [3]
9. Iron powder and Sulphur powder, when mixed together and divided into two parts 'A' and 'B'. When part 'A' was heated strongly over a burner then a substance C was formed. The part B was, however not heated at all, when dilute hydrochloric acid was added to substance C, then gas D was evolved. [3]
- i) What type of substance is B?
 ii) What type of substance is C?
 iii) Name the gas D.

OR

Define the following:

- i) Sol.
 ii) Aerosol.
 iii) Emulsion.

10. Write the chemical formula of the following:
 i) Ammonium phosphate.
 ii) Aluminium chloride.
 iii) Calcium oxide. [3]

Section - D

11. (i) Calculate molecular mass of CH_3COOH .
(ii) Define atomic mass unit.
(iii) What are cations and anions? How they are formed? Explain with examples. [1+1+3]

OR

- (i) Write the cations and anions, present in the following compounds:
 CH_3COONa , NH_4NO_3
- (ii) How many grams of molecules of H_2SO_4 are present in 4.9 gram of the acid?
- (iii) An element 'X' exhibits variable valences as 3 and 5. Write the formula for the chlorides of that element. [2+2+1]

BIOLOGY
Section - A

1. If a potted plant is covered with a glass jar, water vapour appears on the wall of glass jar. Explain why? [1]
2. Formation of tissues are important in multicellular organism. Why? [1]

OR

Mention the role of special types of parenchyma tissue.

3. The inner membrane of mitochondria is deeply folded. Why? [1]
- OR
- What is the significance of mitosis?
4. What will happen if [1]
(a) Apical meristem is damaged or removed from the plant?
(b) Intercellular spaces are present in epidermal layer?

For question numbers 5 and 6, two statements are given one labeled Assertion (A) and the other labeled Reason (R). Select the correct answer to these questions from the codes (a), (b), (c) and (d) as given below.

- (a) Both A and R are true, and R is the correct explanation of the assertion.
(b) Both A and R are true, but R is not correct explanation of the assertion.
(c) A is true, but R is false.
(d) A is false, but R is true.

5. Assertion : Permanent tissues are derived from meristematic tissues once they lose the ability to divide. [1]

Reason: Meristematic tissue is the dividing tissue present in the growing regions of the plant.

OR

Assertion : A simple tissue is made of only one type of cell.

Reason: Various simple tissues in plants are parenchyma collenchyma and sclerenchyma.

6. Assertion : Mitochondria and chloroplasts are semiautonomous organelles. [1]
Reason : They are formed by division of pre-existing organelles and contain DNA but lack protein synthesizing machinery.

7. Read the following passage and answer any **Four** questions from 7(i) to 7(v): [1 x 4=4]

Cell walls permit the cells of plants, fungi and bacteria to withstand very dilute external media without bursting. In such media the cells tend to take up water by osmosis. The cell swells, building up pressure against the cell wall. The wall exerts an equal pressure against the swollen cell. Because of their walls, such cells can withstand much greater changes in the surrounding medium than animal cells.

- 7.1 Amoeba acquires its food through a process termed as

- (a) exocytosis
- (b) endocytosis
- (c) plasmolysis
- (d) exocytosis and endocytosis both

- 7.2 A cell loses water by osmosis when kept in a solution having a lower concentration of water than the cell. The given solution is

- (a) hyper-tonic
- (b) hypo-tonic
- (c) isotonic
- (d) dilute

- 7.3 Transpiration is a phenomenon pertaining to

- (a) Activated transport
- (b) Diffusion
- (c) Osmosis
- (d) Facilitated diffusion

- 7.4 Plant cell does not burst in a hypotonic solution because

- (a) Its cell sap is more concentrated
- (b) Its cell wall resists bursting
- (c) Its cell sap is rich in cellulose
- (d) It does not have a lysosomes

- 7.5 A cell swell up if

- (a) The concentration of water molecules in the cell is higher than the concentration of water molecules in surrounding medium
- (b) The concentration of water molecules in surrounding medium is higher than water molecules concentration in the cell
- (c) The concentration of water molecules is same in the cell and in the surrounding medium.
- (d) Concentration of water molecules does not matter.

Section - B

8. [2]
- (a) Why do plant cells possess large sized vacuole?
 - (b) What kind of plastids are common in roots of the plants and leaves of the plants?

OR

Why lysosomes are called

- (a) Natural scavengers of the cell?
- (b) Suicidal bags of the cells?

9. (a) List any two features of cork which helps them to function as protective tissue. [2]
(b) What is differentiation ?

Section - C

10. (a) Differentiate between sieve tube cells and xylem vessels.
(b) Draw the diagram of the same.
(Use a dark HB Pencil or black pen to draw and label.) [2+1=3]

OR

- (a) Differentiate between meristematic and permanent tissue.
- (b) State the function of collenchyma and sclerenchyma cells.

11. (a) Discuss the result observed [2+1=3]

- (i) When rheo leaves are boiled in water first and then a drop of sugar syrup is put on it?
- (ii) Golgi apparatus is removed from the cell?
- (b) Why meiosis is called as reductional division?

12. Give reasons [1+1+1=3]

- (a) We get a crunchy and granular feeling when we chew pear fruit.
- (b) Meristematic cells have a prominent nucleus.
- (c) It is difficult to pull the husk of coconut.

Section - D

13. (a) Differentiate between nucleus and nucleoid. [2+3=5]

(b) Draw a plant cell and label the parts which

- (i) Packages material coming from ER
- (ii) Is the power house of the cell
- (iii) Provides resistance to microbes to withstand hypotonic external media without bursting
- (iv) Protein making factories
- (v) Fluid contained inside the nucleus

(Use a dark HB Pencil or black pen to draw and label.)

F.M. :- 80

General Instructions:-

- All Questions are compulsory.
- Marks are indicated against each question.
- Questions carry **1 mark** are objective type questions. Answer them as instructed.
- Questions carry **3 marks** are short answer type questions. Answer of these questions should not exceed **80 words** each.
- Questions carry **4 marks** are source based questions.
- Questions carry **5 marks** are long answer type questions. Answer of these questions should not exceed **120 words** each.
- Map questions from History (2 marks) and Geography (3 marks).

HISTORY SECTION- A

- Which of the following statement is not correct? (1)
 - Conservatives wanted to bring change through a slow process.
 - Liberals were in favour of the uncontrolled power of dynastic rulers.
 - Radicals supported women's suffragette movements.
 - Liberals did not believe in universal adult franchise.
- The Jadidists of Russia aimed that... (1)
 - socialist should rule Russia.
 - democrats should rule Russia.
 - modernised Muslims should rule Russia.
 - liberal Christians should rule Russia.
- Which of the following statement gives a clear picture of socialists? (1)
 - They were in favour of accumulation of wealth.
 - They wanted to encourage capitalist entrepreneurship.
 - They wanted to give employment only to the talented.
 - They were against private property.

SECTION- B

4. Explain any three laws, which were introduced by revolutionary government to improve the condition of women in France. (3)
5. Explain any three measures taken by the Provisional Government to suppress the Bolshevik influence. (3)

OR

Explain the status of nobles in Russia before the revolution.

SECTION- C

6. Read the source given below and answer the questions that follows :

At the beginning of the twentieth century, the vast majority of Russia's people were agriculturists. About 85 per cent of the Russian Empire's population earned their living from agriculture. This proportion was higher than in most European countries. For instance, in France and Germany the proportion was between 40 per cent and 50 per cent. In the empire, cultivators produced for the market as well as for their own needs and Russia was a major exporter of grain.

Industry was found in pockets. Prominent industrial areas were St Petersburg and Moscow. Craftsmen undertook much of the production, but large factories existed alongside craft workshops. Many factories were set up in the 1890s, when Russia's railway network was extended and foreign investment in industry increased. Coal production doubled and iron and steel output quadrupled. By the 1900s, in some areas factory workers and craftsmen were almost equal in number.

Most industry was the private property of industrialists. Government supervised large factories to ensure minimum wages and limited hours of work. But factory Inspectors could not prevent rules being broken. In craft units and small workshops, the working day was sometimes 15 hours, compared with 10 or 12 hours in factories. Accommodation varied from rooms to dormitories. Workers were a divided social group. Some had strong links with the villages from which they came. Others had settled in cities permanently. Workers were divided by skill. A metalworker of St Petersburg recalled, Metalworkers considered themselves aristocrats among other workers. Divisions among workers showed themselves in dress and manners too. Some workers formed associations to help members in times of unemployment or financial hardship but such associations were few.

Answer the following MCQs by choosing the most appropriate option :

6.1 Which of the following statements is/are correct for agricultural scene in European countries? (1)

- A. Most of the livelihood of Russian people were based on agriculture.
- B. In Germany half of the population were dependent on agriculture
- C. France is famous for its grain export.
- D. Both (a) and (b)

- 6.2 Large factories were set up in Russia as a result of (1)
- A. Industrial revolution started
 - B. Railway network extended
 - C. Foreign investment increased
 - D. Both (b) and (c)

- 6.3 Identify the reason why government could not prevent rules being broken in Russia's factories? (1)
- A. There were large factories
 - B. Most factories are private property of industrialists
 - C. Owner of the factories dictated the rules according to their own interest
 - D. All of the above

- 6.4 How does it justify that workers in Russia were a divided social groups? (1)
- A. They were divided by skill
 - B. Some had strong links to the villages, others had become City dwellers.
 - C. There were differences in respect of dress and manners in the workers.
 - D. All of the above.

SECTION- D

7. Explain any five main causes of the French Revolution (5)

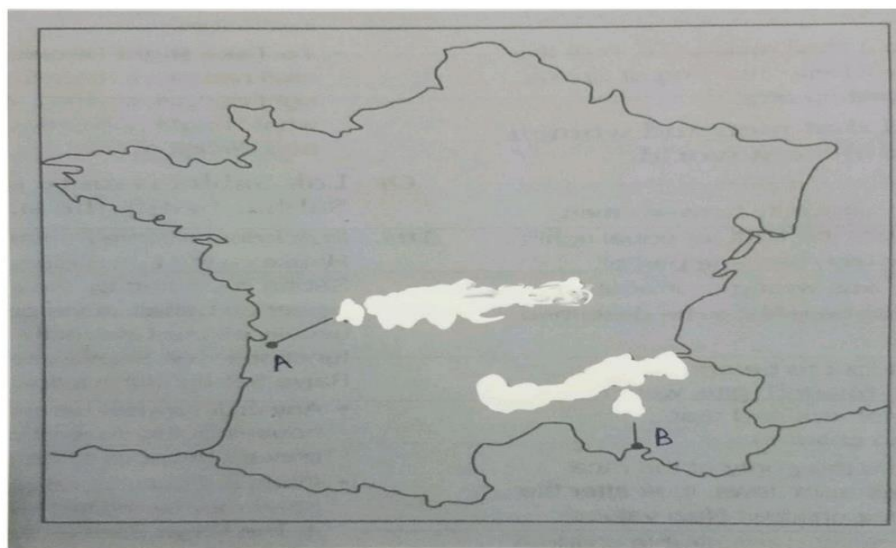

OR

Explain any five features of the constitution of France drafted in 1791.

SECTION- E

8. Two places A and B have been marked on the given outline map of France. Identify them and write their correct names on your answer sheet. (2)

- A. The port city famous for slave trade.
- B. Place associated to National Anthem of France .

POLITICAL SCIENCE

SECTION- A

9. Which of the following statement is correct? (1)
- (a) The army rulers of Myanmar are elected by the people.
 - (b) People have no say under the army rule.
 - (c) Pinochet of Chile was a democratic leader.
 - (d) The king of Saudi Arabia rule because people have chosen him.
10. In China, the National People's Congress has the power to appoint.....of the country (1)
- (a) leaders
 - (b) rulers
 - (c) governors
 - (d) executives
11. What do you know about 'The Long Walk to freedom'? (1)
- (a) It is an autobiography of Mahatma Gandhi.
 - (b) It is an autobiography of Nelson Mandela.
 - (c) It is a documentary film.
 - (d) It is a magazine sponsored by Nelson Mandela.
12. The Preamble of which of the following constitutions involves God? (1)
- (a) The Constitution of the United States of America
 - (b) The Constitution of India
 - (c) The Constitution of South Africa
 - (d) All of the above
13. When did Constitution of India come into effect? (1)
- (a) 26 November 1950
 - (b) 26 November 1949
 - (c) 20 November 1951
 - (d) 26 January 1950

SECTION- B

14. Did the spirit of democracy exist in Pakistan during Pervez Musharraf's rule? Explain any three points. (3)

OR

Why was every election won by the party called PRI in Mexico? Explain any three reasons.

15. Explain any three changes that were brought about in the constitution of South Africa after 1994.

(3)

SECTION- C

16. Read the source given below and answer the questions that follows :

A constitution is not merely a statement of values and philosophy. As we noted above, a constitution is mainly about embodying these values into institutional arrangements. Much of the document called Constitution of India is about these arrangements. It is a very long and detailed document. Therefore it needs to be amended quite regularly to keep it updated. Those who crafted the Indian Constitution felt that it has to be in accordance with people's aspirations and changes in society. They did not see it as a sacred, static and unalterable law. So, they made provisions to incorporate changes from time to time. These changes are called Constitutional Amendments.

The Constitution describes the institutional arrangements in a very legal language. If you read the Constitution for the first time, it can be quite difficult to understand. Yet the basic institutional design is not very difficult to understand. Like any Constitution, the Indian Constitution lays down a procedure for choosing persons to govern the country. It defines who will have how much power to take which decisions. And it puts limits to what the government can do by providing some rights to the citizen that cannot be violated.

Answer the following MCQ's by choosing the most appropriate option :

16.1 Which of the following not relates to Constitution of India?

7. Read the source given below and answer the questions that follow:

According to the variations in relief features the Northern plains can be divided into four regions.

The rivers, after descending from the mountains, deposit pebbles in a narrow belt of about 8 to 16 km in width lying parallel to the slopes of the Shiwaliks. It is known as *bhabar*. All the streams disappear in this *bhabar* belt. South of this belt, the streams and rivers re-emerge and create a wet, swampy and marshy region known as *terai*. This was a thickly forested region full of wild life.

The largest part of the Northern plain is formed of older alluvium. They lie above the flood plains of the rivers and present a terrace like feature. This part is known as *bhangar*. The soil in this region contains calcareous deposits locally known as *kankar*. The newer, younger deposits of the flood plains are called *khadar*. They are renewed almost every year and so are fertile, thus, ideal for intensive agriculture.

Answer the following MCQs by choosing the most appropriate option.

खुशामद तो मनुष्य की ही नहीं अपितु भगवान की भी होती है। हमारा कोई भी धर्म-ग्रंथ यहाँ तक कि काव्य और नाटक भी, उठाकर देख लीजिए, आरंभ में मंगलाचरण अर्थात् देवताओं की खुशामद जरूरत होती है। देवताओं की खुशामद क्यों? इसलिए कि वे प्रेरणा देते हैं, स्फूर्ति देते हैं। मुगलों के जमाने में कोरनिश करने का खास ढंग था। दरबार आम में जब शहंशाह पधारते तो बंदीजन खास अंदाज और लहजे से " हुजूर तशरीफ ला रहे हैं " कहते थे। खुशामद के आलंबन चाहे युग के अनुसार बदलते रहे हों पर मूल भावना वही रही है। खुशामद से कौन खुश नहीं होता? नम्र व्यक्ति में योग्यता एवं तेज बुद्धि दोनों होती है, किंतु खुशामदी में न योग्यता होती, न बुद्धि। इन्हीं कमजोरियों को छिपाने के लिए वह खुशामद का मार्ग अपनाता है। जो व्यक्ति खुशामदियों से अपना कार्य चलाते हैं, उनके बारे में भी यही बात सच है। चापलूस व्यक्ति रिश्वत देते हुए खुशामद करते हैं तथा अपनी नौकरी में तरक्की या 'प्रमोशन' पाते हैं। जो अधिकारी ऐसे 'प्रमोशन' देता है, वह इसी पद्धति से अधिकारी बना होता है।

प्रश्न -

(i) खुशामद किसकी होती है?

(क) सिर्फ मनुष्य की

(ख) मनुष्य और भगवान दोनों की

(ग) सिर्फ भगवान की

(घ) देवताओं और भगवान की

(ii) खुशामदी व्यक्ति में कौन से गुण नहीं होते?

(क) नम्रता और उदारता

(ख) योग्यता और बुद्धि

(ग) योग्यता और उदारता

(घ) सच्चाई और योग्यता

(iii) देवताओं की खुशामद क्यों की जाती है –

(क) मंगलाचरण के लिए

(ख) काव्य और नाटक लिखने के लिए

(ग) भय के कारण

(घ) प्रेरणा और स्फूर्ति के लिए

(iv) खुशामदियों से अपना कार्य निकलवाने वालों के बारे में क्या सही है –

(क) वे तेज़ बुद्धि के होते हैं।

(ख) वे दूसरों से काम करवाते हैं।

(ग) वे लालची होते हैं।

(घ) वे अपनी कमज़ोरियाँ छुपाते हैं।

(v) चापलूस व्यक्ति को प्रमोशन देनेवाला अधिकारी कैसा होता है?

(क) नम्र

(ख) तीव्र बुद्धि

(ग) योग्य

(घ) चापलूस

Section - A (LESEN)		
1.	Liest den Text	
	<p>Endlich 15!</p> <p>Felix ist jetzt fünfzehn Jahre alt. Er geht in die 10. Klasse. Im neuen Schuljahr hat er einige andere Lehrer bekommen. Sein Kommentar: Ich habe Glück gehabt. Gute Lehrer sind geblieben, schlechte sind gegangen."</p> <p>Seit einem Jahr geht Felix montags und freitags jeweils eine Stunde zum Wing Tsun, einer chinesischen Kampfsportart. Man muss zwölf Schülergrade schaffen, um Meister zu werden. Die erste Prüfung nach einem halben Jahr hat er geschafft. Kampfsport ist mein Ding, meint er. Die Selbstverteidigung ist für ihn dabei aber nur ein Nebeneffekt: Eigentlich geht es mehr um Aggressionsabbau."</p> <p>Seit einiger Zeit gehört ein Tier zur Familie: Bella, ein Berner Sennenhund. Alle gehen abwechselnd mit ihm raus. Um das Fressen kümmert sich die Mutter von Felix. Seit kurzem hat Felix einen Plan, der für einige Diskussionen sorgte: Er will den Führerschein A1 machen. Damit kann man Motorräder mit 125 Kubikzentimetern und 80 km/h Höchstgeschwindigkeit fahren. Den Führerschein bezahlt Felix' Mutter, wenn er nicht mit dem Rauchen anfängt. Allerdings wünscht er sich ein sportliches Motorrad, das man auch schneller machen kann. Das kann ich auch noch fahren, wenn ich achtzehn bin", meint Felix. Er hat seiner Mutter einen Prospekt von der Maschine gezeigt. Die dachte bis dahin, er wünscht sich einen Roller. Sie hat sich die Unterlagen fünf Minuten angeguckt und dann gesagt: Jetzt müssen wir reden." Denn ihr Mann, Felix' Vater, ist vor drei Jahren mit einem Motorrad tödlich verunglückt. Felix hat seine Mutter überzeugt. Allerdings gibt es Bedingungen: Die schulischen Leistungen müssen gut sein. Felix darf nicht an der Maschine basteln, um sie schneller zu machen. Er darf nicht auf der Autobahn fahren und er muss immer Schutzkleidung tragen.</p> <p>Warum es unbedingt eine Rennmaschine sein muss? Ich habe schnelles Fahren gern, genau wie mein Vater. Auch mit dem Fahrrad oder auf Skiern fahre ich schnell - ich brauche den Kick!"</p>

Sonst können wir vielleicht wichtige Kleinigkeiten vergessen. Was brauchen wir und wie viel? Das müssen wir genau überlegen. In welcher Menge kaufen wir etwas? Das hängt von der Zahl der Gäste ab. Und wenn das Geld nicht reicht, ist es auch Problem. Wir bitten unsere Gäste, etwas zum Essen oder Trinken mitzubringen.</p> <p>Musik und farbige Lichter machen die Stimmung Ohne Musik ist keine Party ein Hit! Wir bitten die Musik - Freak unserer Clique, die Party - Musik zu besorgen. Das Licht machen wir aus. Mit Kerzen und Nachttischlampen schaffen wir die richtige Atmosphäre.</p> <p>Kein Ärger mit Nachbarn Bevor die Gäste kommen, geben wir den Nachbarn Bescheid. Es ist eine gute Idee, ihnen ein kleines Geschenk zu geben. Dann ärgern sie sich nicht, wenn es zu laut wird.</p> <p>Stress vermeiden Während der Party können einige Dinge leicht kaputt gehen. Um das zu vermeiden, räumen wir sie weg. Nach der Party brauchen wir auch Hilfe bei dem Aufräumen. Wir bitten unsere Freunde, uns dabei zu helfen.</p>
